Re: Respect of terms of Assembly Bill 2998 - **CALIFORNIA PROP 65 - TB 117-2013**

we know that AB 2998 prohibits the sale and distribution of products containing **Flame Retardant (FR)** chemicals at a level greater than 1,000 ppm.

We can ensure that our product **Pelkò 541 Antistatic ESD** does

not contain FR components beyond the limit.

We investigate also:

the content of components listed in :

WAC 173-334-130 (defined in AB 2998: chemical listed on the Washington State Department of Ecology's

list of Chemicals of High Concern to **Children** in § 173-334-130 of Title 173 of the Washington Administrative Code as of January 1, 2019)

- The content of substances listed in **California Prop 65**.
- The content of other dangerous substances

And we can ensure that the product **meets the requirements** above listed.

The product meets the test defined in TB 117-2013.
